Macbeth-Evans Lighting Glass

Number 128

Macbeth-Evans Glass Company
Pittsburgh U. S. A.

Introductory

A survey of the residential lighting fixture glassware market discloses the astonishing fact that there are more than 118 million sockets in the United States requiring globes and shades. This does not include the many thousands of stores and offices which need modern lighting glassware. Here indeed is a tremendous market—one which alert dealers are already cultivating profitably.

It has been with this market in mind that we have prepared this catalog, sparing no effort or expense to have illustrated to the best advantage the most complete variety of residential and commercial glass that has ever been included in a book of this kind. It will best serve that dealer who is alert to the possibilities of extending his business or increasing his glassware sales. In this catalog you will find illustrated a wide range of beautiful residential lighting glass and a complete line of commercial units arranged in the most convenient manner. The residence lighting fixtures used in showing the application of glass were loaned through the courtesy of the fixture manufacturers mentioned and are not for sale by us.

BALL LAMP SHADES—Page No. 5.

Beautifully decorated shades which transform the harsh light of unshaded lamps into an attractive mellow glow.

CANDLE SHADES—Page No. 7.

A comprehensive variety of distinctive shapes and designs in beautiful colors. They are rapidly supplanting silk shades by reason of their beauty and permanence.

THEBIAN—Page Nos. 9 to 18 inclusive, 37.

Rich coloring together with unusual shapes and designs has made Thebian a widely appreciated line of etched lighting glass.

ARTIAN—Page Nos. 20 to 29 inclusive, 36 and 37.

The newest of Macbeth-Evans creations. Simplicity of shape and design characterizes this beautiful glass which is decorated with exquisite colors.

ALBA—Page Nos. 33 to 35 inclusive.

The original white diffusing glass for use with high-powered light sources. When roughed Alba closely resembles Carrara Marble.

MONAX—Page Nos. 38 to 43 inclusive.

A truly remarkable diffusing glass transforming the piercing brilliancy of high-powered lamps into soft usable illumination with a minimum of light absorption. Monax is the most widely used commercial glass.

IVORIAN—Page Nos. 44 and 45.

In appearance it is like old ivory. Ivorian is also furnished with a tinted medallion.

VESTEX—Page Nos. 46 to 49 inclusive.

An Opal glass of unusually high quality. Tinted Vestex is very attractive.

CYLINDERS—Page Nos. 30 and 50.

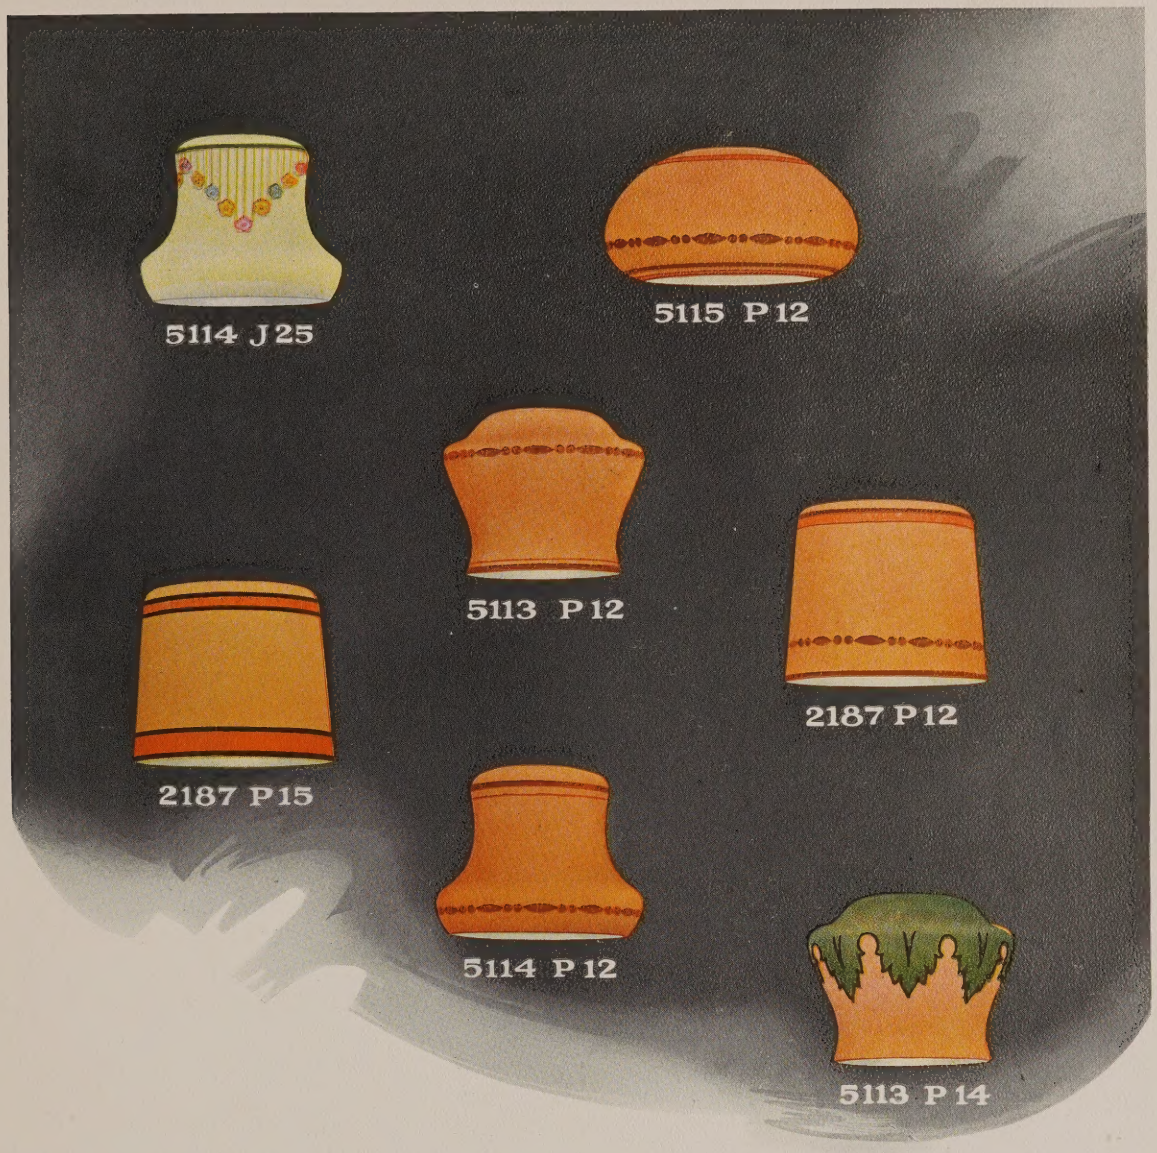
Furnished in Artian glass, Page No. 30, and also in Antique, Antique Tinted Dark Amber, Amber, Amethyst and Rose, Clear and Crystal Glass Roughed Inside, Page 50.

"THE AURORA"—Page No. 19.

Perfection in dining-room illumination. Partially closed at the bottom, it showers direct light on the table, but completely shields the eyes of the diners from glare.

COLONIAL LANTERN—Page No. 31.

An unusual effect for the lighting of hallways and porticos.



Artian Ball Lamp Shades

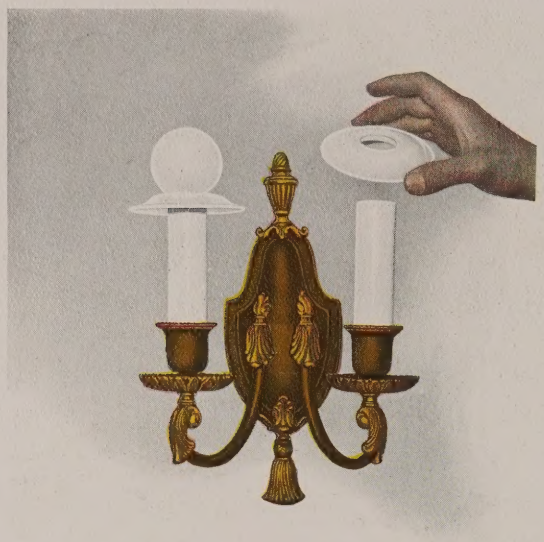
5113 P14	4 in.	3¼ in.	25 watt round frosted

Furnished with Macbeth-Evans Ball Lamp Shade Holders.
*Furnished with Blue, Green or Brown Bands.



A new patent holder is furnished with every Macbeth-Evans candle shade. This holder is made of glass and fits any standard candle-type fixture, holding the shade in an unvarying vertical position.

The holder fits the bottom of the shade snugly, the candle part of the fixture passing up through the circular hole in the center of the glass. Made of translucent glass, the holder diffuses the light in such a way that there is no glare to irritate the eyes. It is practically invisible to the eye whether the bulb is lighted or not.

The opposite illustration shows the ease with which Macbeth-Evans ball lamp shades are applied to fixtures. The holders for these shades are supplied with the glass.
